

Contract Staffing & Recruitment Agency Platform - Project Requirements Document

Business Idea Overview

The platform is a technology-enabled recruitment and contract staffing agency focused on IT hiring. The business connects companies with pre-screened candidates and earns revenue through permanent placements and contract staffing arrangements. The long-term vision is to evolve from a traditional recruitment agency into an AI-powered talent acquisition platform.

Business Goals

- Help companies hire faster.
- Build a large database of IT professionals.
- Automate candidate screening and matching.
- Generate revenue through hiring fees and staffing margins.
- Scale into a national IT staffing brand.

Target Customers

- Startups
- Mid-size IT companies
- Enterprises
- Consulting firms
- Product companies

Revenue Model

1. Permanent Hiring: Charge 8%–20% of annual CTC for successful placements. 2. Contract Staffing: Charge clients monthly and retain a staffing margin. 3. Recruitment Process Outsourcing (Future). 4. Premium Talent Search Services (Future).

Website Objectives

The website should serve as:

- Company website
- Lead generation platform
- Candidate portal
- Recruitment CRM
- AI-powered talent matching platform

Public Website Pages

1. Home Page 2. About Us 3. Services 4. Industries Served 5. Open Positions 6. Employers Page 7. Candidates Page 8. Contact Us 9. Blog / Resources 10. Privacy Policy 11. Terms & Conditions

Homepage Requirements

Hero Section: Headline: Hire Pre-Screened IT Talent in Days, Not Months. Buttons: • Hire Talent • Submit Requirement • Upload Resume Additional sections: • Services • Roles We Hire • Why Choose Us • Hiring Process • Testimonials • Contact Form

Services Section

- Contract Staffing
- Permanent Hiring
- Bulk Hiring
- Executive Search
- Remote Hiring
- Project-Based Staffing

Roles We Hire

- Data Engineer
- Python Developer
- Azure Engineer
- ServiceNow Developer
- DevOps Engineer
- QA Engineer
- Full Stack Developer
- Business Analyst
- Data Analyst
- Project Manager

Employer Portal

Employers should be able to: • Submit job requirements • Track hiring status • View shortlisted candidates • Schedule interviews • Download candidate profiles

Candidate Portal

Candidates should be able to: • Register • Upload resume • Maintain profile • Apply for jobs • Track application status • Receive notifications

Admin Dashboard

Modules: • Client Management • Candidate Management • Recruiter Management • Job Management • Revenue Tracking • Analytics Dashboard • User Management

Recruiter Dashboard

• Assigned Jobs • Candidate Pipeline • Interview Tracking • Placement Tracking • Performance Metrics

AI Features

1. AI Resume Parsing 2. AI Candidate Match Score 3. Skill Gap Analysis 4. Resume Ranking 5. Automated Candidate Recommendations 6. JD-to-Candidate Matching

Database Requirements

Candidate Data: • Name • Contact Details • Skills • Experience • Resume • Current Location • Expected Salary Client Data: • Company Information • Requirements • Hiring Status

Technology Stack

Frontend: • React.js • Tailwind CSS Backend: • Python FastAPI Database: • PostgreSQL Authentication: • JWT Cloud: • Azure or AWS AI Layer: • Python ML Models • OpenAI APIs or local LLMs

Future Roadmap

Phase 1: Agency Website + Lead Generation Phase 2: Candidate Database + Job Portal Phase 3: Recruitment CRM Phase 4: AI Matching Engine Phase 5: Full SaaS Talent Platform

Success Metrics

• Number of Clients • Number of Active Jobs • Candidate Database Size • Placement Count • Monthly Revenue • Client Retention Rate
